New Key Features in Introduction to S/4HANA using Global Bike 4.2

Overview of the changes in Introduction to S/4HANA using Global Bike 4.2

Product
SAP S/4HANA 2022
Global Bike

Fiori 3.0

Level
Instructor

Focus
Global Bike

Version
4.2

MOTIVATION

This document provides you with a brief overview of the innovations that were implemented with the version change from 4.1 to 4.2.

This document mainly contains the changes relevant for teaching. For reasons of clarity and comprehensibility, minor bug fixes are not listed in detail.

S/4HANA 2022

The S/4HANA with Global Bike 4.0 was developed on an S/4HANA 2020 system. The subsequent Global Bike 4.1 is also based on the same S/4HANA version. For our new Global Bike 4.2, the previous S/4HANA was updated to version 2022, which means that current SAP functions are available.

In addition to the new opportunities this brings, a variety of other projects are underway in which experts from the community are extending functionality for the community, creating localizations, and designing new educational content.
