Record which status does Equipment has. You can see this by clicking the button ⓘ beside the Status field.

Status of Equipment: <u>INST – Installed</u>

Use the additional tabs for answering the following questions:

In which maintenance plant is the Equipment located?
DL00 – Plant Dallas

To which work center is the Equipment linked ?
MANT1000 – DL Maintenance

Which company code is linked to the Equipment?
US00 – Global Bike Inc.

Which Functional Location is the superior one?
DL00-S-SHFL1000

Then click on the home icon **SAP** to return to the Fiori Launchpad overview.

EAM 2: Display Functional Location

Exercise Display a Functional Location.	**Time** 5 min
Task Use the SAP Fiori Launchpad to display a Functional Location.	

To display a Functional Location, go to the space *Enterprise Asset Management* in the role of *Production Manager* use the App *Functional Location Structure*.

Fiori App

> Functional Location
> Structure

In the *Functional Location Structure: Selection* screen enter **DL00-S-SHFL1000** as Functional Location and select **Equipment installed** in the Explosion area.
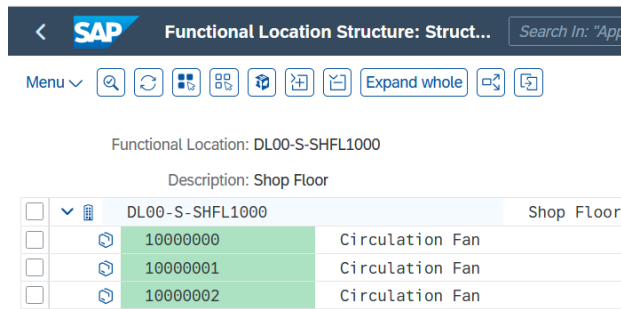

DL00-S-SHFL1000

Equipment installed

Click on Execute to confirm your entries. Ignore the message that may appear, "The top level of structuring has been reached."

Now you can see the structure list of the Functional Location (Shop Floor).

The functional location is an organizational unit of logistics that structures the objects of a company to be maintained according to functional (e.g., drive unit), process-oriented (e.g., condensation), or spatial (e.g., hall) aspects. A functional location represents the location where a maintenance measure is to be performed.

Click on the home icon to return to the Fiori Launchpad overview.
